natskina/https://github.com/NatskiNa

I'm a front-end developer specializing in creating responsive and user-friendly applications. With a strong interest in React, I enjoy developing interactive features while enhancing my skills. My foundational backend knowledge helps me understand full-stack challenges. I'm eager to bring fresh ideas, adapt to new tools, and stay current with industry trends.

PROFESSIONAL EXPERIENCE

Ahmed Tech Academy Web Developer Intern **/** April 2024 - Current

- Designed and developed a responsive website for a coding bootcamp start-up using React.
- Implemented an SEO strategy by conducting keyword research using Google Ads Keyword Planner to create Schema Markup in React with JSON-LD, ultimately improving search engine visibility through effective utilization of Schema.org and the Google Rich Results Test.
- Created an engaging 3D robot character in Spline that greets users, improving first impressions and site engagement.
- Developed a chatbot to enhance user interaction and support by leveraging ChatGPT API. Created a JSON file to store comprehensive school information, enabling the bot to provide answers directly from this data or, for questions beyond the available information, to utilize ChatGPT assistance.
- Developed a dynamic blog page that features infinite scroll for improved user experience, utilizing react-helmet-async for SEO optimization and React Router for seamless navigation.
- Utilized EmailJS for setting up user-friendly forms, facilitating efficient user communication.

Nordstrom Sr. Designer **/** May 2015 - June 2023

• As the lead designer of sweaters and knits for the Nordstrom brands, I developed collection ideas that aligned with our target customer and brand vision, while providing mentorship and guidance to the design team. I collaborated with leadership and cross-divisional partners to ensure strategic alignment and worked closely with vendors to maintain quality.

PROJECTS

Portfolio - *React responsive portfolio website*
https://nnakano-portfolio.vercel.app/
https://github.com/NatskiNa/nnakano-portfolio

Premier League Fan Site *- JavaScript, HTML, CSS, BootStrap -- 3 pages soccer fan site with JS game (group project)*
https://github.com/NatskiNa/PL_fanSite

Task Manager - *ReactJS -- cloud app where users can track tasks*
https://simple-task-manager-2vgosb0u1-natskinas-projects.vercel.app/
https://github.com/NatskiNa/simple-task-manager

EDUCATION

Full Stack Web and Mobile Development / Nucamp, February 2024
Full course on web and mobile development with Bootstrap, React, React Native, Node.JS and MongoDB
Certifications:
Javascript Fundamentals; Dynamic with React; Mobile with React Native; Backend with NodeJS

Bachelor's of Fashion Design / Parsons School of Design, New York

SKILLS

- JavaScript
